Squeeze the nut on the adjustment. The blade that retains nut/bol must be reviewed periodically and and if necessary, especially after braking. Disconnect power before changing the sheet or service. The warnings, precautions and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. To make precise cuts, the FENCE must be perpendicular (in a 90o E¡tulo) to the saw blade. 7 Operation They are not safety glasses. People with pacemakers should consult their mismers before using. Table A: Recommended minimum wire gauge for extension cords (120 volt) ampers Name (at full charge) Extensiá "n cord length 25á € ² 50á € ² 100á € ² 150á € ² 0 á € " 6 18 16 14 6.1 á € " 10 18 16 14 12 10.1 á € " 12 16 16 14 12.1 á € " 16 14 14 12 12.1 á € " 16 14 12 Do not use. The upper edge of the extensions will be level with the surface of the mountains. Support the piece to be level with the table, and so that the cut is made the cut pieces do not fall. Includes vibrations free permit every work day. If it still does not fit ,contact a qualified electrician to install the right output. WARNING: Manage the cord on this product will show you to lead, a chemical known by the state of California to cause centers, and birth defects or other reproductive damage. Note: additional functions are explained in another place in the manual. 5. Brink the head of the Sierra to check the current configuration. First unplug the tool. The operator must understand that the common sense and precauaion are factors that cannot be incorporated into this product, but must be supplied by the operator. Press on the spindle lock (150) on the back of the Sierra's head and maintain it. To reduce the risk of lesion, return to the complete rear position crusade. Industrial applications must follow Osha's guidelines. Do not wear high -speed steel blades, abrasive blades, metallic cutting blades or masonic masonry cutting I mean. I don't know.Product: 1 mW, Wavelength: 630-670 nm CLASE II This product complies with 21 CFR 1040.10 and 1040.11 Diode Mir.: Zhenjiang Bouncer Stone Electron Co, Ltd, 2F, Guyang Xincun Uptown 16 Din Mao Rd., Zhenjiang, China Manufacture Date: AVOID EXPOSURE This laser light is issued from Miter angle adjustment A miter cut is one that is at an angle through the horizontal surface of the material. To reduce the risk of vibration-related injury: 1. Safe working pieces at the saw table using the Clamp or other clamp devices (not included). 11. The unapproved security team cannot provide adequate protection. With narrow material, press directly down "gathering" the material. Use the protective coating of the hair to contain the long hair. Do not wear loose clothing, gloves, ties, rings, bracelets or other jewelry that can be trapped in mobile parts. Nicotine reduces blood supply to hands and fingers, increasing the risk of vibration-related injury. The use of accessories or accessories not recommended by the manufacturer can result in a risk of injury to people. 12' DOUBLE-BEVEL SLIDING MITER SAW with LASER GUIDE When unpacking, make sure that the product is intact and without damage. While the lock of Miter is released, the table will be blocked at the often used miter angles, including 22.5o, 30o, 45o and 90o on the left and right sides. DOWN TO PREPARE THE ACCIDENTAL OPERATION SERVICE INJURY!: Turn off the tool power switch and disconnect the tool from your electrical output before performing any procedure in this section. Insert the ends of the table extensions into the holes on the sides of the Base. *IMPORTANT: The spin screw has a left-handed thread and is removed turning CLOCKWISE. The blade and bolt washerspecially designed for your saw, for optimal performance and safety of operation. The diagrams within this manual cannot be drawn proportionally, proportionally I'm not going to do it. ##### manual. If the work surface and any workpiece supports are not level, and on the same level, unwanted bevel angles will appear in the cuts resulting in poor joinery. Don'tÁÁt for attachment to do a job for which it was not designed. 21. Moving guards must freely and close instantly. Read the angle on the Bevel Indicator. Never use damaged or incorrect blade washers or bolt. Turn the Depth Stop Bolt clockwise to decrease depth and counterclockwise to increase depth. When servicing use only identical replacement parts. Never reach around saw blade. If the material binds the blade, release the trigger. ÁCÁ Copyright 2012 by Harbor Freight Tools No portion of this manual or any artwork contained herein may be reproduced in any shape or form without the express written consent of Harbor Freight Tools. If the plug does not fit fully in the outlet, reverse the plug. Also use face or dust mask if cutting operation is dusty. USE PROPER EXTENSION CORD. SAFETY OPERA TION MAINTENANCE SETUP Page 13 Page 13 For technical questions, please call 1-800-444-3353. Prepare to begin work before turning on the tool. Bevel cuts can be used in combination with a miter cut to form a compound angle. Thread the Miter Knob into the end of the table above the Miter Lock until securely in place. If abnormal noise or vibration occurs, have the problem corrected before further use. Raise the saw head assembly. Align the marked location of the cut on the work material with the saw blade. WEAR PROPER APPAREL. Keep hands out of path of saw blade. Due to continuing improvements, actual product may differ slightly from the product described herein. Write the product'sÁÁs serial number in the back of the manual near the assembly diagram (or month and year of purchase if product has no number). If either test reveals that the cut is not a true 90ÁÁ angle, adjust the Fence before beginning work. (California Health & Safety Code AÁA 25249.5, et I mean, I don't know. ##### contacted involuntarily. Pregnant women or people who have impaired blood circulation in the hand, past injuries, nervous system disorders, diabetes or Raynaud disease should not use this tool. Turn on the Miter Knob rotating about 1/4 turn in the opposite direction. Press slightly to cut the material. Relinquish toys and ladies. (See Outlets for 2-Prong Plug.) Miter Saw Safety Warnings for Your Own Safety Read Instruction Manual Before Operating Miter Saw 1. Allow space to both the left and the right of the saw for long pieces. 16. The working area should not allow children or pets to access in order to prevent injuries and distractions. Follow instructions for lubricating and changing accessories. Depth Stop Bolt (136) Depth Stop Nut (137) Depth Stop (44) Figure D Workpiece and Work Area Set Up 1. Attention! Make sure the Lower Guard (133) works smoothly and properly protects from the Sword before using the saw. REDUCE THE RISK OF THE NINE STARATION. AFTER USQ, clean external surfaces of the tool with clean cloth. A 30o cut is often used for a scarf joint or to make a caressed end. Last night, he's not staying at Beam Max. Move the Pivot Plate of the Guard up and out of the way. Remove the screws and make another test cut. Any inaccuracy must be visible. Table extensions are inserted on each side of the table, and are blocked instead using the wing screws. Miter Saw Safety Alerts (cont.) SAFETY OPERA TION MAINTENANCE SETUP Page 6 Page 6 For technical questions, call 1-800-444-3353. Feed the work in a blade or cutter against the rotation direction of the blade or cutter only. Put the Pivot Bolt of the Guard (193) until the Pivot Plate of the Guard (132). Turn theof Pivote de la Guardia (132) back in place, and assure yourself with the Bolt of the Pivot Guard (193). Grip the sierra handle, press one of the locks of the trigger with the thumb, and press the trigger to start the atneimarreh al ejed acnuN .etnemacit;Ámotua atnemua roirefni n'Áicetorp al ,ognam le ajab es odnauc :aidrauG ed n'ÁicarepO .ragul us ne saidrag nis arreis erapo oN .Jorem'Án eneit on otcutorp le jÁrmoc ed oꝰÁa y sem of e¡albasme ed amargaid led acrec launam led roitrops etrap al ne otcutorp led eires ed orem'Án le abircE .acrec al ed sojel sorbmocse o nÁrresa reiuqac aeplgo ,elbisop setna ol ocid©Ám onteimarosea euqsub ,seluza o socnals soded sol y otneimicemutne le ,oegumroh le omoc n'Áicarbiv al noc sodanoiceler ocisÁf o ocid©Ám amotnÁs n'Ágja etneis IS .odasesd olugn'Á la asem al aveum ,ojaba aicah ertim ed oeuqolb le eneiots sarteimM .ojabart ed aerjÁ le ne sociÁcepsse sorgilep sol arap HSOIN rop adaborpa res ebod airtaripser n'Áicceortp al y ISNA rop adaborpa res ebod ratuoc n'Áicceortp al .ajabart sarteim n'Áicalucric erbil al ritimrep arap lanoicida dutignol etneicifus noc ojabart ed aerjÁ la ragell ebod n'Áicatnemila ed elbac IE .estulnic nedoup on ocivres le y e¡albasme le arap sadireuqer satneimarreh saL .oeguqolb ed etroc ed lazobac la adnuforp artunar anu noc rodasap le raonilia 1 3 2 .lazobac led oeguqolB SADANOICCELES SENOICNUF ED NAICPIRCSEED SENOICNUF 48696 olucÁtra .sevarg senoisel racovorp edeup ,oirartnoc ol ed .osu le ne ragul us ne aczenamrep j18(anretni adirb al euq ed eser'ÁgesA .atonN .etnemacitrev olugn'Á ne jÁtse euq onu se lesib ed etroc nU lesib ed olugn'Á le ratsuA .41 .etroc led dadidnuforp al ralortnoc arap dadidnuforp ed adarap ed onrep le esu .ojabart ed azeip al atroc on euq sojenoc ed etroc nu o gnifreuq nu aased es IS dadidnuforp ed adarap al odnasU 48696 otneimeI .ojaba aicah zul al ed n'Áiserp al esu .lairetam le atneuc ne agnet oN .otcutorp etse rasu o rarugifnoc ed setna omsim le ne solutÁbus ne otxet sol sodot soliducni .launam etse ed ozneimoc la dadiruges ed n'Áicamrofni ed etnatropmi n'Áices al adot eel otneimanoicnuf ed senoiuctsrnl 48696 otneimeI .resjÁl ÁAug al y unattended. All visitors must stay at the safe distance of the work area. 8. 1. Let the tool do the job. Wet wood, green wood (not seasoned) and pressure-treated wood have a greater potential for bribery and should only be cut with a blade to cut that type of wood. To change theFirst loosen the tuer of ground depth in the depth bolt. (California Health and Safety Code, § 25249.5, et seq.) 30. It will do the best and safer work at the rate of which it was designed. When properly installed, the top face of the table extensions is leveled with the table and provides a wider support surface for the workpiece. Avoid the involuntary beginning. It should not be used for any cutting operation. Test workshop for children with desks, master switches or remove the boot keys. Keep the work area well lit. If the workpiece is not compatible, it will tie the blade and can cause the material to retire, potentially causing injuries. Press down the groin block to unlock the table. Security operation maintenance configuration Page 5 For technical questions, call 1-800-444-3353. 6. You can also reverse the two pieces, hold the cut ends together and hold a good straight edge along the side of the pieces. Check the cut with a precise square. Not following warnings and instructions can cause electrical discharges, fires and/or serious injuries. Cleaning, maintenance and lubrication 1. Article 69684 22. Place the boned side of the brida against the blade. When using an extension cable, be sure to use one heavy enough to carry the current that will draw your product. Verify all guards for proper operation after service. Before the additional use of the tool, a guard or other part that is damaged must be carefully checked to determine that it will work properly and perform its intended function: verify the alignment of the mobile parts, the binding of the mobile parts, the breaking of the parts, assembly and any otherthat can affect its functioning. Unplug the tools before the service; By changing the accessories, such as blades, bits, cutters and similar. Keep this manual. Bezel cuts can be used to ingest relatively wide and thin material. 2. Assembly 1. Some examples of these chemicals are: á€ eI don't know. I'm sorry, in n place. Hold the work material in place using the Clamp. Electromagnetic fields in close proximity to heart pacemaker could cause pacemaker interference or pacemaker failure. Bevel Indicator Bevel Lock Knob Figure C SAFETY OPERA TION MAINTENANCE SETUP Page 12 Page 12 For technical questions, please call 1-800-444-3353. Item 69684 Maintenance and Servicing Procedures not specifically explained in this manual must be performed only by a qualified technician. Replacing the Blade 1. SAFETY OPERA TION MAINTENANCE SETUP Page 14 Page 14 For technical questions, please call 1-800-444-3353. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. 27. USE RIGHT TOOL. Lay a carpentereÁÁs square on the table with one edge along the blade and the other along the Fence. Recheck one last time, then proceed to work. The use of improper accessories may cause risk of injury to persons. 12. If any parts are missing or broken, please call 1-800-444-3353 as soon as possible. Save all warnings and instructions for future reference. WARNING! Only adjust the front Bolt. Mounting Use the four bolt holes provided in the Base to mount the Miter Saw to a stable support before use. To reduce the risk of electric shock, double insulated equipment has a polarized plug (one blade is wider than the other). 28. Spindle Lock Figure A 6.
